DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of species 5 of Figure 7 with claims 10-16 readable thereon in the reply filed on 01/14/2005 is acknowledged. The traversal is on the ground(s) that the number of species claimed in the present application does not exceed a reasonable number. This is not found persuasive because it is well settled that species are required to be restricted if it is shown that these species are distinct. It is clearly established that species are in fact distinct in the previous office action.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 10-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase "the light passes through the second total reflection surface" in claim 10 renders the claim indefinite. A total reflection surface is characterized as a surface that totally reflects incident light (see page 8 of the specification) and an anti-reflection surface receives the incident light and passes it through. Therefore, it is unclear and confusing to recite light passing through the second total reflection surface against the meaning clearly defined in the specification that light is totally reflected and does not pass through the total reflection surface.
